Subject: REVIEW OF RESULTS OF RADIOLOGICAL TESTING ON GROUND
WATER SAMPLES FROM THE INDUSTRIAL EXCESS LANDFILL (IEL)
SUPERFUND SITE, UNIONTOWN, OHIO

Dear Mr. Antonelli:

Ohio Department of Health Bureau of Radiation Protection (ODH/BRP) staff have reviewed the results of radiological testing on ground water samples collected from the above site in August, 2000. We have also reviewed correspondence and results of several sampling campaigns dating from 1988 to the present.

It is our considered opinion that the evaluation provided by Audier & Associates in the Sharp & Associates project report is correct, and that radionuclides found in the ground water samples are consistent in identity and concentration with naturally-occurring materials found in this region of the state.

If you have any questions or need additional information, please feel free to contact me, or call Ruth H. Vandegrift, Supervisor, Decommissioning at 614-644-2727.

Sincerely,

Handwritten signature of J. Eric Denison in cursive.
